

Venice Shores Canal Water Test Results 2017

Our canals were tested for e-coli bacteria on Sunday July 2nd. These are the results. Remember, 300 colonies or above is considered unsafe for human contact. That's when beaches are closed.

Sample	Site	E. Coli Colony Count
1	Canal 1 Mcdougal	3 colonies/100mL
2	Canal 1 Intersection	13 colonies/100mL
3	Canal 2 New Home East	6 colonies/100mL
4	Canal 3 Memminger	5 colonies/100mL
5	Canal 4 Gregor	6 colonies/100mL
6	Lagoon	1 colonies/100mL
7	Canal 4 Fleming	13 colonies/100mL
8	Canal 5 Prymak	160 colonies/100mL

Note: samples 1,3,4,5, and 8 were taken approximately half way down the canal. The other samples were taken at the intersections near where the canal circulates under the road. The names are the houses located where the samples were taken.
